***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 14-16,18-25,33-40,42 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims stand rejected for the terminology "coating the fibers...to impregnate that perform" which is considered confusing. Terminology such as "impregnating the perform with elemental carbon to initially predominantly coat the fibers of the fibrous structure" would overcome this rejection. Coating does not cause impregnating to occur.

***Claim Rejections - 35 USC § 102***

3. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
4. Claims 14-16,18-25,33-40,42,43 are rejected under 35 U.S.C. 102(a or e) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Gruber et al (6,537,654), for reasons of record.

Applicants argument that Gruber does not teach the use of boron carbide or other ceramic slurry to impregnate the a preform is not persuasive in overcoming the rejection because this is considered a method step and does not patentably distinguish the claimed product. It is further argued that boron carbide regulates the grain size of the silicon carbide. Firstly claims 14-25 are silent as to requiring boron carbide and/or

Art Unit: 1755

the grain size of the silicon carbide. Secondly applicants have not shown by way of tangible evidence that the grain size of the instant claims is outside that achieved by Gruber. Column 12, lines 7-17 of Gruber describes boron carbide as more than just a filler but a component that increases the hardness of the body which would require some affect on the microstructure of the composite. Although Gruber prefers the matrix to include SiC, Si and carbon this does not exclude boron carbide to be present as an additional component in the composite. Gruber when referring to the matrix is describing the matrix formed from the reaction of silicon and carbon. As to Gruber suggesting to add silicon carbide, the silicon carbide is an optional component and is not added in any of the examples. Furthermore, the instant claims do not exclude silicon carbide being added.

5. The rejection over the Japanese document 2000-56064 is withdrawn in view of the amendments to the claims requiring the fibers be coated with carbon.

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1755

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
